

✓	Date	Portal	Description	Remarks
☐	20/09		We have progress tracker and SP are required to update live care packages (clients) on weekly basis	
☒	20/09	Public	Integration of wellness profile (MVP version)	
☒	20/09	Public	Client Wellness Profile completion indicator	
☒	20/09	Public	Landing page re-model to match Fresha (and some part of AirBnB) adding Find Care and Services at high level	
☒	20/09		Understanding about Full scope by all parties needed to make sure application is built to accommodate future implementations. - full scale wellness profile set up - integration of unregulated services - recommended services for Clients - Subscription improvements - Services for SPs - PA services improvement - other	
☒	18/09		CR summary can get complicated due using codes for the care types. Keeping long care type name also not possible as it can be lengthy.	Reason for the summary is for the SP to make quick decision when a CR is delivered via the app to the locked screen.
☐	17/09	Public	public web html ready for presentation, similar to Fresha	
☐	12/09		We should add PA services packages Free support finding a care package Pay as you go PA services Hire your PA for 3hours every month	
☒	11/09	Public	Wellness profile Figma	
☐	09/09		ElderPA MVP Care Package Comparison (Refined)	Care Package Name (e.g., Visiting Care – Daytime, Residential Dementia Care). Service Type Home Care / Care Home. Suitable For Age Range: e.g., 65+, 75+, etc. Conditions: Dementia, Physical disabilities, Learning disabilities, Mental health, General elderly support. Basic Package Details Minimum Visit Length: 30 mins / 45 mins / 1 hr (home care). Minimum Weekly Hours: e.g., 3 hrs minimum. ☒	08/09	Public	How it Works for Service Providers	Partner With Us Search and claim your business on ElderPA. Set Up Your Provider Account Add your locations, the care offered at each location, and set up your rate card for each care type. Build & Post Your Care Packages Showcase your services as packages, including offers, total hours, and pricing. Boost Your Care Package Highlight your packages to stand out and reach more clients. Get Matched with Clients Receive care requests in real time. Submit Your Offer Confirm the matched price or add a promotion/discount. Book New Clients Secure bookings and grow your business. With the ElderPA App, you'll get instant care request alerts and can submit offers quickly – anytime, anywhere.
☒	07/09		Mobile app demo	
☒	03/09		Care Request should be filtered based on the area and linked to regional hierarchy. A PA can see Cars in their allocated area	
☒	01/09		Also boosting page and the package detail page need our side of hrml design.	
☒	27/08		Why do we assign a rate care to a care type during the initial setup? What was the purpose? If it is for package creation we could add rate card at the time?	
☒	26/08		We didn't include the option of couple rate, please add this as an option to show couple rate options if user requirement is set to couple. Not all SPs will have couple rate.	
☐	25/08		App Design & Navigation •Bottom Navigation Tabs: •Home (Care Providers & Packages) •Requests (Pending, Active, Completed) •Inbox (Notifications & Messages) •Profile •Floating Action Button (FAB): Used to start new care requests Personalisation & Wellness (Phase 02) •Option to fill out a Wellness Profile (separate flow) •Includes mobility, dietary needs, cognitive status, etc. •Used to pre-fill care requests and match suitable providers •Conditional data sharing: •E.g., only mobility shared for taxi bookings	
☐	25/08		Chat box can not be hardcoded, it should be customisable by PA and possibly Ai driven in the future. They can use PA q&A feature for this.	

	25/08	PA should be restricted from amending data of a sensitive nature 1. Cqc data 2. service user info (unless they subscribed to PA services) 3. Service user data (care summary) can not be updated once it is (care request)published 4. CQC data can not be amended once an SP is onboarded. (! usually you can't)
